

Secure all application access in one place.

Centagate Cloud offers a centralized login option that protect all applications from security breaches by using FIDO2 passwordless authentication.

Centagate Cloud in brief

- Control, protect and secure your application access.
- One login credential for all application.

Secure

A system that has strong digital security which eliminates phishing, fraud and password theft.

All-in-one

Since the authentication is centralized, only one login credential is needed for all applications.

Cost effective

Highly cost-effective with zero CAPEX and minimal OPEX.

Key Features

Multifactor authentication

An authentication that requires two or more factor like what you have (device), what you are (biometrics) and what you know (password).

Adaptive authentication

An authentication based on previous login's risk and behavior. Evaluating these risk could stop any trials of security breach.

Passwordless authentication

An authentication with the combination of Adaptive Intelligence and Multifactor authentication, that improves security and user experience.

Integrated FIDO2 server

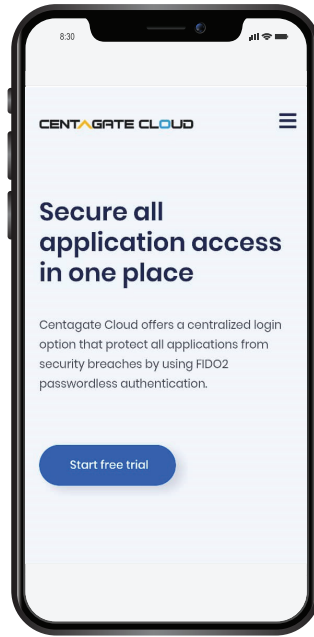

Pre-integrated certified SecuMetric FIDO2 server for registration and authentication. This is where it is passwordless and more protected.

Let's Get Started

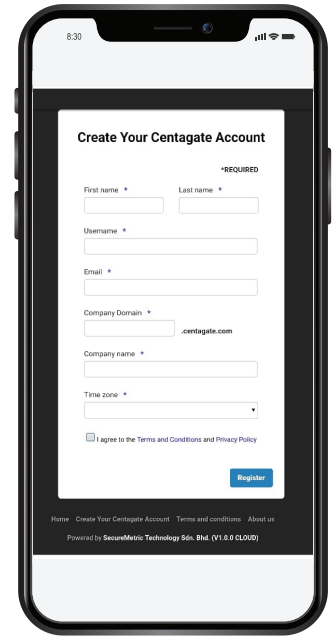

Step 1

Visit centagatecloud.com through any browser with your devices.

Step 2

Click on the Start free trial button and it will guide you to the next page

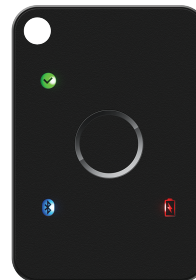

Step 3

Fill up the details and you're ready with your free CENTAGATE Cloud account.

Or visit our demo booth

Our helper will show you how CENTAGATE Cloud works and help you on registration if needed.

CENTAGATE Cloud compatible with FIDO2 Token
